

Task Acceptance Criteria

The screenshot shows a Jira issue page for 'IMS-8'. The issue title is 'As a user I can create items, delete items, update items, view a specific item, or view all items in the system.' The issue is in the 'To Do' status. The 'Child issues' section lists four tasks: 'IMS-25 Create ItemDAO Class', 'IMS-26 Create ItemController class', 'IMS-39 Test ItemDAO class', and 'IMS-40 Test ItemController Class'. The 'Story point estimate' is 10. The 'Assignee' is 'Unassigned'. The 'Reporter' is 'Sam Tarullo'. Red arrows point to the 'MoSCoW' label, the 'Definition-of-Ready' label, the 'Definition-of-Done' label, and the 'Story point estimate' field. A red circle highlights the '2' story point estimate for the first two child issues.

Projects / IMS / Items / IMS-8

As a user I can create items, delete items, update items, view a specific item, or view all items in the system.
